

HOT WATER TWO STEP SKIDS

Largo Two Step Cleaning Systems are specifically designed to Wash Trucks, Buses, and Rolling Stock. Remove Road Film, Bugs, Diesel Smoke and other contaminants from vehicle surfaces while Brightening Aluminum Rails. Largo's Hot Water Two Step Skids are ideal for use where incoming water temps need to be raised to around 80° Degrees to assist in the cleaning process, especially in our Northern Areas during the winter months. When the temperature is warm enough, simply reconfigure the machine for use without the burner and wash with Cold Water.
